EXPERIENCE

SOFTWARE ENGINEER / PROGRAMMER ANALYST S3

Vertere Global Solutions Inc. / Albertsons Philtech | Manila, Philippines
August 2023 - Present

Part of the Service Delivery Group that automates business processes using Java Spring Boot and Scala Spark/Databricks, while doing support and incident management using applications such as ServiceNow, Grafana, DataDog, and more.

Experienced in data warehousing using Snowflake and NoSQL database management using MongoDB and Cassandra, as well as Kafka tool for real-time data streaming, topics, and messages.

Experienced in Microsoft Azure Log Analytics and queried logs for support purposes using Kusto Query Language (KQL). Ensure application is properly working by reviewing implementation and making necessary adjustments.

Daily stand-up meeting and present, report, and discuss tasks done and backlogs to the team and manager.

IT SOFTWARE DEVELOPER

EVRAZ North America | Regina, Saskatchewan, Canada

January 2022 - May 2022

Part of a team that worked on a project where we transitioned from EIS legacy workflow to K2 Cloud Nintex Workflow. Built new SQL queries and updated existing SQL queries, as well as modified stored procedures using SQL Server.

Management Studio(SSMS) and created and designed the report on Report Builder 3.0.

Published reports on SQL Server Reporting Services (SSRS) and worked with linked servers.

Developed a brand new and existing K2 Nintex application.

Debugged new issues on K2 Nintex applications and reports, as well as communicated with business users for application and report enhancements.

Used Team Foundation Server (TFS) as version control on new and updated codes on VisualStudio.

INFORMATION SYSTEM VOLUNTEER

JIL Church Regina | Regina, Saskatchewan, Canada

December 2021 - Present

A member of the Management Information Systems (MIS) Ministry working on automation of the current manual church procedures.

Automate processes such as Membership Information, Attendance, Financial Reports, EventsOrganizing, News, and Calendar of Events in a single system.

Developed a web application exclusively accessible within our church's local network. This application generates QR codes and automatically dispatches them via email to both new and existing members for attendance purposes, while also securely storing membership information in a database.

Technologies used: PHP CodeIgniter Framework, SQL (MySQL), HTML, CSS, JavaScript, jQuery,Ajax, Json.

MORGAN STANLEY HACKATHON PARTICIPANT

Morgan Stanley - Montreal, Quebec, Canada

July 2021

Designed and built a website to foster interactive participation in physical activities among teenage girls while promoting mutual encouragement, motivation, and positivity through user-generated content.

Placed as a 1st runner up on the competition.

Technologies used: Angular framework. HTML5/CSS, Bootstrap5, MySQL.

YOUTH COACH

Briercrest College | Caronport, Saskatchewan, Canada

August 2018

Training and developing over 100 players in a positive and motivating group environment to support their individual and team goals.

Lead a team by connecting with each player through storytelling and shared experiences.

PROJECTS

Information Management System- Church Management System (JIL Church Regina - Canada)

Developed a comprehensive Information Management System automating church procedures, enhancing efficiency in membership management for JIL Church in Regina, Canada.

Dev2Friend - Social Media Platforms For Developers (University Of Regina Thesis)

Designed and implemented a social media platform, Dev2Friend, as a thesis project at the University of Regina, catering specifically to developers and fostering a collaborative online community.

BiggerPicture - Micropolling Website (University Project)

Created BiggerPicture, a micropolling website, as part of a university project, providing a platform for users to engage in quick polls and share their opinions. Morgan Stanley Hackathon (Montreal, Quebec, Canada)

Grit Dominate - A Fitness Website With Information Management System (Personal Project)

Initiated and executed a personal project, Grit Dominate, combining a fitness website with an Information Management System to streamline data and enhance user experience in the fitness domain.
