The screenshot shows the Members module of the Church Management System. It lists members such as John, Smith (MEN Network), Member, Test, and Test Member, 1. Each member has a contact number, email address, and current address. A modal window titled 'Edit Member' is open for John, Smith, showing fields for Name, Contact Number, Email Address, and Current Address.

The screenshot shows the 'Add to Ministry' dialog box. It lists three ministries: MAN, SAN, and WAN. The user can select a ministry to add to a member.

The screenshot shows the Ministry Information table. It lists members Smith John and Test Member under the Multimedia Arts Network (MAN).

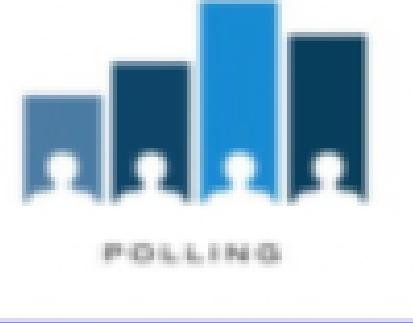

The screenshot shows the Events module. It lists events like June 24 - Night of Prayer, fda, and TEST. A detailed view of the TEST event is shown, listing attendees and their details.

The screenshot shows the General Information form for an event. It includes fields for Event Description, Detailed Description, Date & Time, and Status.

The screenshot shows the Membership Attendance form. It includes fields for Attendee QR Code and a Non-Member button.

The screenshot shows the Event Attendees section, which includes tables for Member Attendees and Non-Member Attendees.

User Guide:

- This is the landing page of Part 1. Click on the profile button on the top right corner and it will have dropdown values for signing in, signing up, and accessing a registered profile.
- If the account is in record, it will direct the user to the user profile's page by clicking on "Profile", if not then it will direct the user to the login page.
- A user can also register another account by clicking on "Add another account" from the profile button on the top right corner of the page.
- Once inside the user profile's page, it will direct you to your profile page which lists all the websites you've bookmarked, and also some of your user information.
- Finally, you can bookmark a website by clicking the "Bookmark a Website" button. You need to copy the URL of the website that you want to bookmark and paste it into the input field, then click the "Bookmark" button
- After bookmarking a website, it will be displayed on your user profile's bookmarked list, as well as on the landing page.
- Signout will log the logged in user and will destroy your current session. You can signout if you want to login on another account

Code Teacher – Coding Website Tutorial

Amiel De Los Reyes' Page

Home Part 1 Part 2 Part 3 Part 4

CodeTeacher - A Teaching Website to Learn HTML/CSS/JavaScript

Welcome Page

Unit 1 (HTML/CSS)

Unit 2 (JavaScript)

Unit 3 (XML/AJAX)

Welcome Coders!

This is a coding website that teaches you the basics of HTML, CSS, and JavaScript!

HTML is short for HyperText Markup Language.

CSS is short for Cascading StyleSheet.

JS is short for JavaScript.

What the Application Does:

1. Teaches the fundamentals of HTML/CSS and JavaScript technologies, as well as advanced concepts about them.
2. Every unit has a quiz at the end to test your knowledge and to be able to apply what you've learned after reading the contents.
3. You get to keep track of your progress and relearn the topics you had difficulty with!

Instructions:

Information

1. Navigate through each unit through the navigation bar by just clicking the unit that you would like to study. It is recommended that you study from Unit 1 to Unit 3 respectively.
2. Quizzes are located at the end of a unit. Answer each quiz to test your knowledge, after hitting the "Submit" button, you will be shown your quiz results as well as the correct answers.
3. Happy Coding!

CodeTeacher - A Teaching Website to Learn HTML/CSS/JavaScript

Welcome Page

Unit 1 (HTML/CSS)

Unit 2 (JavaScript)

Unit 3 (XML/AJAX)

Basic Fundamentals of HTML5 and CSS

HTML5 stands for HyperText Markup Language 5. It is a markup language that acts as a skeleton of the website. It contains the structure and the contents of the website.

CSSs stands for Cascading Style Sheets. It is formats the document contents and provides layout, colors, background, fonts, and more. It designs the website and makes it user friendly.

In this tutorial, we will focus on the fundamentals of HTML5 such as tables, forms, page-structure elements, and some new input types. We will also go through the fundamentals of CSS in order for us to design our website.

HTML5:

- The main elements of HTML5 are *html*, *head*, and *body*. The *html* element is the parent element of the whole HTML document. The *head* element contains information about the HTML document such as the title, character set, and some other external links. The *body* element contains the contents of the website which is displayed on the browser.

Instructions:

Information

1. Navigate through each unit through the navigation bar by just clicking the unit that you would like to study. It is recommended that you study from Unit 1 to Unit 3 respectively.
2. Quizzes are located at the end of a unit. Answer each quiz to test your knowledge, after hitting the "Submit" button, you will be shown your quiz results as well as the correct answers.
3. Happy Coding!

Take the quiz:

What does a strong tag do?

- a: Increase the size of the text
- b: Does an emphasis effect on the text
- c: Moves the text on top of a page
- d: Bolds the text to show importance

Where should the title element appear in an HTML5 document?

- a: Nested inside the p tag
- b: Nested inside the body tag
- c: Nested inside the head tag
- d: Nested inside the footer tag

Which is NOT an HTML input type?

- a: tel
- b: email
- c: gender
- d: date

Who has the highest priority between the style sheets?

- a: Inline Style Sheet
- b: Internal Style Sheet
- c: External Style Sheet
- d: Absolute Style Sheet

Which CSS concept is one of the most important?

- a: Embedded Style Sheet
- b: Bold tag
- c: Box Model
- d: Paragraph tag

Aral - Online Course Management System

Aral - Online Learning Course Management System

User Guide:

- This is the landing page of Part 2. It contains the courses available for the users. By clicking on the image, it will direct a user to the tutorial's playlist. Click on the profile button on the top right corner and it will have dropdown values for signing in, signing up, and accessing a registered profile.
- If the account is in record, it will direct the user to the user profile's page by clicking on "My Profile", if not then it will direct the user to the login page.
- A user can also register another account by clicking on "Create Account" from the profile button on the top right corner of the page.
- Once inside the user profile's page, it will direct you to your profile page which displays some of your user information and lists all the courses available for you, as well as the ones you've added. You can click on the course title and it will direct you to the tutorial's playlist.
- Navigate through pages through the navigation bar on the profile's page. It has the Overview, Add a Course, Take a Quiz, and also the view of the parsed XML file that is displayed in the HTML.
- You can add a course by clicking on "Add a Course" navigation button. It is an EML that will store the values in the database.
- You can also take a quiz about the courses listed on the page by clicking on the "Take a Quiz" navigation button.
- Signout will log the logged in user and will destroy your current session. You can signout if you want to login on another account
